JULEN CAIPA

Analytics Engineer | Data Engineer | Business Intelligence
+57 300 241 9293 | caipajulen@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Analytics Engineer with 5 years of experience working with data and 2+ years in data analytics roles. Hands-on experience designing and administering **Snowflake** data warehouses, building **ETL/ELT pipelines** with **Python and SQL**, and developing **data models** and **semantic layers** that deliver business-ready data to BI tools. Experience with cloud services on **AWS** (S3, Lambda) and **Google Cloud**, containerization with Docker, and data governance through metadata tagging and classification. Also builds AI solutions on Snowflake, including AI agents and RAG pipelines.

WORK EXPERIENCE

AntPack **Bogotá, Colombia**
Data Analyst | SQL & Snowflake *April 2025 – Present*

- Architected and administered **Snowflake** data warehouses end-to-end: designed database and schema structures, created tables, and managed the ingestion and upload of structured and unstructured files from multiple source systems.
- Automated end-to-end **ETL pipelines** using **Python and SQL Server**, integrating data from HubSpot, Salesforce, Google Analytics, Adobe Analytics, and Semrush APIs.
- Designed and optimized **data warehouses and data models** to support advanced analytics, reporting, and campaign performance tracking.
- Constructed **semantic and analytical layers** on top of Snowflake warehouses to feed BI dashboards and reporting tools with business-ready, curated data.
- Developed metadata tagging and data classification frameworks within Snowflake to organize, label, and contextualize business information, improving **data governance** and discoverability.
- Built and deployed **AI agents** on Snowflake to automate data retrieval, decision support, and business process workflows.
- Designed and implemented **Retrieval-Augmented Generation (RAG)** pipelines on Snowflake for intelligent information retrieval and contextual business insights.
- Managed **Salesforce Marketing Cloud** data extensions and CRM campaigns for Terpel, organizing customer data for segmentation and campaign targeting.
- Built interactive dashboards in **Power BI** and Looker Studio to monitor KPIs such as traffic sources, SEO performance, customer acquisition, and conversion rates.
- Developed machine learning models in Python and Dataiku to predict customer trends, engagement patterns, and social media growth, including data cleaning, feature engineering, and model validation.
- Automated reporting workflows using Google Apps Script and Google Sheets, reducing manual effort and improving operational efficiency.

SLB **Cota, Colombia**
Internship: Supply Chain Data Analyst *February 2024 – February 2025*

- Automated data management and cleaning processes to ensure **data accuracy and consistency**.
- Developed and implemented automation solutions using **Python** to streamline processes and improve efficiency.
- Created and executed data analysis scripts to extract valuable insights from large datasets, supporting key business decisions.
- Designed and built interactive dashboards in **Power BI** to support strategic decision-making within the Supply Chain department.
- Collaborated with cross-functional teams to ensure seamless data integration.
- Designed and implemented workflows using Power Automate and developed custom applications with PowerApps to streamline operational tasks.

Promotora Inmobiliaria R&G **Bogotá, Colombia**
Data Engineer | Developer – Automation of Administrative Processes *June 2021 – December 2023*

- Supported cloud migration and infrastructure optimization efforts using **AWS** services (S3 for document storage, Lambda for automation triggers).
- Utilized **Google Cloud** tools (Firestore, Google Sheets API, Google Analytics) to integrate structured and unstructured data sources into a centralized process automation framework.
- Designed and deployed **Python**-based automation pipelines to streamline core administrative workflows, including lease agreement generation and penalty clause calculations, reducing manual effort and ensuring regulatory compliance.
- Built **SQL** queries and reports to extract and analyze operational data, improving internal visibility and reporting accuracy.
- Containerized applications using **Docker** to ensure consistent development and deployment across environments.
- Engineered a property inventory control system using Flutter and Firebase, enabling real-time tracking of property availability and operational status.

TECHNICAL SKILLS

- **Data Warehousing:** Snowflake (database architecture, schema design, data ingestion, semantic layers, tagging, AI agents, RAG)
- **SQL & Data Modeling:** SQL, SQL Server, PostgreSQL, MySQL, MongoDB, ETL/ELT, data transformation
- **Cloud & DevOps:** AWS (S3, Lambda), Google Cloud (Firestore, Sheets API), Docker
- **Programming:** Python, SQL, R, JavaScript
- **BI & Visualization:** Power BI, Tableau, Looker, Looker Studio
- **Data Sources & CRM:** Salesforce Marketing Cloud, HubSpot, Google Analytics, Adobe Analytics
- **Machine Learning & Automation:** Dataiku, Power Automate, PowerApps, AppSheet, Google Apps Script

EDUCATION

Universidad Militar Nueva Granada **Bogotá D.C., Colombia**
Bachelor of Mechatronic Engineering *Expected Graduation: June 2025*

CERTIFICATIONS & TRAINING

- SQL for Data Science — University of California, Davis (Nov 2024)
- Gestión del análisis de datos — The Johns Hopkins University (Oct 2024)
- Exploratory Data Analysis for Machine Learning — IBM (Nov 2024)
- Supervised Machine Learning: Regression — IBM (Nov 2024)
- Supervised Machine Learning: Classification — IBM (Nov 2024)
- Python 101 for Data Science — IBM Developer Skills Network (Feb 2024)
- Basic JavaScript Programming Certificate (Jun 2022)
- Certificate in Basic Programming (Aug 2022)

LANGUAGES

Spanish (Native), English (Intermediate-Advanced)
